

An Nguyen, Dr.-Ing.

**Digital Focus Topic Lead AI and Digital Assistants @ Siemens Healthineers | Postdoc @ FAU |
AI Freelancer**

Berlin, Germany | an.nguyen@live.de | [LinkedIn](#) | [GitHub](#) | [Google Scholar](#) | [webpage](#)

Professional Summary

AI technical leader with 8+ years of professional machine learning experience across industry and academia (10+ years including research appointments during graduate studies). Currently leading AI & Digital Assistants for Siemens Healthineers Customer Services, defining AI strategy, architecture, governance, and enterprise adoption of agentic AI, LLMs, knowledge graphs, multimodal AI, and digital assistants. Ph.D. in Computer Science with an active postdoctoral affiliation, combining research excellence with hands-on delivery of production AI systems.

Core Competencies

- **AI Strategy & Leadership:** AI Strategy • Enterprise AI Architecture • Technical Leadership • Product Ownership • AI Governance • Responsible AI • Stakeholder Management • Cross-functional Leadership • AI Roadmapping • Technology Strategy • Innovation Management
- **Machine Learning & AI:** Agentic AI • Large Language Models (LLMs) • Retrieval-Augmented Generation (RAG) • Knowledge Graphs • Ontologies • Multimodal AI • NLP • Explainable AI • Probabilistic Machine Learning • Time Series Analysis • Predictive Analytics
- **Engineering & MLOps:** Python • PyTorch • TensorFlow • Azure • Databricks • MLOps • SQL • Git • Linux • Cloud & On-Prem Infrastructure • ML System Design
- **Product & Delivery:** Product Ownership • Agile Development • Technical Program Leadership • AI Solution Architecture • Production ML Systems • Enterprise Software • Digital Assistants • Customer Service AI
- **Research & Healthcare:** Healthcare AI • Medical Devices • Clinical Data Analytics • IoT Analytics • Process Mining • Scientific Research • Experimental Design • Technology Transfer • Research Supervision • Mentoring

Professional Experience

Siemens Healthineers — Digital Focus Topic Lead AI & Digital Assistants (Jun 2024–Present)

- Lead AI strategy, architecture, and roadmap for Customer Services.
- Lead cross-functional initiatives delivering agentic AI, LLM, multimodal AI and digital assistant solutions.
- Design reusable AI platforms using Azure, Databricks, knowledge graphs, semantic technologies and on-prem infrastructure.
- Define governance for trustworthy AI, evaluation, explainability, and responsible AI.
- Partner with executives, architects and engineering teams to translate AI research into enterprise products.

Senior Data Scientist & Product Owner (Oct 2022–May 2024)

- Designed and deployed production ML systems processing near-real-time industrial machine data.

- Built operational intelligence platforms with automated ticketing, monitoring and predictive analytics.
- Co-organized enterprise AI innovation challenge and hackathon.

Data Scientist & Product Owner (part-time during Ph.D.) (Oct 2018–Sep 2022)

- Developed production ML solutions using IoT, enterprise and PLM data.
- Built explainable AI solutions for customer sentiment prediction and operational analytics.
- Co-inventor of a US patent for AI-driven customer satisfaction prediction.

Freelance AI Engineer (Mar 2024–Present)

- Build LLM, agentic AI and production ML solutions for startups.

University of Erlangen–Nürnberg (FAU)

- Postdoctoral Researcher (2023–Present): supervise Master's and Ph.D. students; healthcare AI research.
- Doctoral Researcher (2018–2023): machine learning for healthcare and business analytics.

Earlier Research Experience

- Visiting Researcher, University of California Irvine (2022): probabilistic modelling of irregular and mixed-type time series.
- Visiting Researcher, Frankel Cardiovascular Center & Biomedical & Clinical Informatics Lab, University of Michigan (2017): developed ML and signal-processing algorithms for atrial fibrillation detection from ECG and clinical data.
- Student Researcher, TU Berlin (2016): rehabilitation engineering and control systems.

Education

- Dr.-Ing., Computer Science — University of Erlangen–Nürnberg (Magna Cum Laude)
- M.Sc., Electrical Engineering — Technical University of Berlin (Grade 1.0)
- M.Sc.Eng., Electrical & Computer Engineering — University of Michigan (GPA 4.0/4.0)

Selected Research, Leadership & Awards

- 13 peer-reviewed publications in machine learning and healthcare AI, including ICML, UAI, IJCNN, IEEE Access and Journal of NeuroEngineering and Rehabilitation.
- Selected Publications
- US Patent: AI-based Customer Satisfaction Prediction for Medical Devices.
- Co-founder, Siemens Healthineers Dataneers Community (300+ members); Founder, Data Science Community (300+ members).
- Reviewer: NeurIPS, IJCAI, ECML.
- Outstanding Master's Degree Award (VDI), Fulbright Travel Grant, Rosa Luxemburg Foundation Scholarship.
